## Projects and Volunteer Work

- **ArtSpeak** A personal project created for painting enthusiasts to share opinions and get inspiration. I learned how to properly build a fullstack app using Ruby on Rails and deployed to production on Heroku. See the project [here](#).
- **MovieTell Bot** A Telegram bot i created to get the top trending movies and links to their trailers. Designed by following SOLID design principles, fully tested. See source on [GitHub](#)
- **Flower e-shop** A frontend implementation of a flower e-commerce store built using HTML5, CSS3. See the source on [GitHub](#)
- **DSC-Laikipia Web Lead** Hosted 10+ web development workshops and 2 Hackathons that attracted more than 150 developers and made connections with local businesses around the university where we develop web based solutions for their needs.
